

C2  
Concl. having the third indicium, the player wins a second amount if he achieves a winning combination on the 5x5 game using balls having either the second or third indicium and the player wins a third amount if he achieves a winning combination on the 5x5 game using balls having any indicia. --

#### COMMENTS

In the Advisory Action dated November 25, 1994, the Examiner indicated that the Claims 10 and 12-17 would be allowable. The only remaining item in this application is the Examiner's requirement that the drawings be amended to show the method of play. This requirement is imposed under 37 CFR 1.83(a).

Applicant submits herewith new Figures 4, 5 and 6 which are flow charts that depict the method of play of the game as set out in Claims 10, 12 and 13, respectively. The specification has been amended on page 7 to include brief descriptions of these new figures.

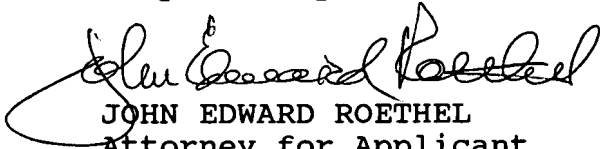

The specification has also been amended at page 13 to add a description of Figure 4, 5 and 6. The description tracks the flow chart of these figures and the flow chart in each figure tracks one of the independent claims. It is submitted that no new matter has been introduced.

Applicant requests the entry of this amendment, along with the amendment after final rejection filed on November 7, 1994 in order to place this application in condition for allowance. All of the remaining claims have been indicated by the Examiner as

allowable subject to the drawings being corrected to comply with 37 CFR 1.83(a). It is submitted that the attached new Figures 4, 5 and 6 meet the requirements of the Examiner.

If the Examiner has any further questions regarding this application, the Examiner is requested to call undersigned counsel.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "John Edward Roethel", is written over the typed name.
